CAREER SUMMARY:

GIS and Remote Sensing graduate with strong experience in urban analysis, academic research mapping, and spatial modeling. Contributed to a PhD dissertation in Urban Planning Geography at Benha University by producing high-quality thematic, analytical, and decision-support maps covering urban growth, land use, population density, public services, hydrology, and groundwater.

Also contributed to **three academic promotion research projects** for the rank of Professor, including a study titled *"Spatial Analysis of Places of Worship in Old Cairo District."* Demonstrated proficiency in ArcGIS Pro and ERDAS Imagine, with a strong ability to support planning, research, and decision-making through advanced spatial analysis and cartographic design.

Seeking to contribute to impactful geospatial, urban planning, and development projects.

KEY SKILLS:

ArcGIS Pro, ERDAS Imagine, Remote Sensing, Spatial Analysis, Suitability Analysis, Hydrological Analysis, Land Use Mapping, Change Detection, Choropleth Maps, Topographic Maps, Field Survey, Cartography, Digitizing, Geodatabase Management

PROFESSIONAL EXPERIENCE:

Company Name. Faculty of Arts, Menoufia University (Egypt)

- Surveying and GIS Project Team Leader 1 week (Starting May 13, 2024)
 - Led a student team in an integrated project combining field surveying and GIS applications in Wadi El-Shallal, Matrouh. Conducted field data collection using GPS and total station, organized team workflow, and ensured data quality. Utilized ArcGIS Pro to process spatial data, produce topographic and network maps, and perform spatial analysis for hydrological studies and land suitability assessment. Gained hands-on experience in georeferencing, digitizing, and thematic map design.
- Academic Promotion Research Projects 6 weeks (12/10/2025 – 26/11/2025)
 - Contributed to **three research projects for academic promotion to Professor**, including *"Spatial Analysis of Places of Worship in Old Cairo District"*. Produced high-quality maps and spatial analyses to support decision-making and urban planning.
- PhD Research – Urban Planning 7 months (June 2025 – January 2026)
 - Contributed to a PhD dissertation in Urban Planning at Benha University, producing and analyzing 50+ thematic and analytical maps covering land use, population density, public services, hydrology, and groundwater quality. Applied advanced GIS techniques to support planning decisions and urban studies.

PROFESSIONAL TRAINING : offline

- 1. Introduction to Geographic Information Systems (Level 1)
- Training Center: GIS Unit, Faculty of Arts – Menoufia University
- Hours: 21 Hours | Instructor: University Certified | Date: From 02/08/2023 To 20/08/2023
- Description: Fundamentals of GIS, spatial data types, software basics, and practical applications.

- 2. GIS Editing and Data Refinement Techniques (Level 2)
- Training Center: GIS Unit, Faculty of Arts – Menoufia University
- Hours: 21 Hours | Instructor: University Certified | Date: From 22/08/2023 To 07/09/2023
- Description: Focused on GIS data editing, attribute correction, and topological validation.

PROFESSIONAL DEVELOPMENT: **online**

- Brilliant Remote Sensing Labs

Certified Remote Sensing Specialist (RSS)TM

- Space science and satellite overview for general managers & supervisors
- remote sensing fundamentals
- Introduction to Practical Remote Sensing (Using ERDAS IMAGINE)
- Satellite Images Geometric Correction and Map Projection
- Satellite Images Visual Interpretation
- Satellite Images Digitizing and Annotation
- Satellite Images Classification Essential
- Satellite Images Enhancement
- Map Production from Satellite Images

Certified Remote Sensing Professional (RSP)TM

- Satellite Images Subsetting and Mosaicking
- Satellite Images Classification (Advanced) + Image Differencing
- Satellite Images Terrain Analysis
- 3D viewing & Simulation For Satellite Images Using Virtual GIS
- Satellite Assembly, integration, and testing Course using the educational satellite (EDUCAN CanSat) from Orion Space

- NASA

- Fundamentals of Remote Sensing

- ESRI

- Acquire Data for a GIS Project
- ArcGIS Pro Basics
- Basics of Geographic Coordinate Systems
- Change Detection Using Imagery
- Creating and Sharing GIS Content Using ArcGIS Online
- Deep Learning Using ArcGIS Pro

- Displaying Coordinate Data on a Map
- Exploring GIS Maps
- Getting Started with Data Management
- Getting Started with Spatial Analysis
- Integrating Data in ArcGIS Pro
- GIS Basics
- Introduction to CAD and BIM Data
- Location-Enabling Data
- Python for Everyone
- Sharing Maps and Layers with ArcGIS Pro
- Using GIS to Solve Problems

- ESRI MOOC

- Spatial Data Science The New Frontier in Analytics
- The ArcGIS Imagery MOOC Foundations and Frontiers

PROFESSIONAL CERTIFICATE:

- **Certified Remote Sensing Specialist (RSS)™** – Brilliant Remote Sensing Labs (April 2024)
- **Certified Remote Sensing Professional (RSP)™** – Brilliant Remote Sensing Labs (November 2024)
- **Fundamentals of Remote Sensing** – NASA (October 2025)
- **GIS Basics & ArcGIS Pro Certificates** – ESRI Academy (April 2025)

ESRI MOOC:

- Spatial Data Science: The New Frontier in Analytics (October 2025)
- The ArcGIS Imagery MOOC: Foundations and Frontiers (November 2025)

EDUCATION:

Menoufia University – Faculty of Arts, Department of Geography

Bachelor's Degree in Geography / GIS, Remote Sensing & Surveying

Duration: 09/2021 – 06/2025

GPA: 3.19/4.00 (B+)

SKILLS:

Language skills:

- **Arabic:** Mother Tongue.
- **English:** Good.

Technical skills:

- ArcGis Pro
- ArcGIS Desktop
- ERDAS Imagine
- QGIS
- Google Earth Pro
- AutoCAD
- Google Earth Engine
- Microsoft office

PERSONAL INFORMATION

- **Military service:** Currently in progress at Mostakbal Misr Authority – El Sadat Sector
 - **Date of Birth:** 5/11/2002
 - **Nationality:** Egyptian
-
